- Stand mattress and box spring upright against the walls. Remove plastic or non-bedbug proof mattress covers.
- DO NOT place items on top of beds, chairs, sofas and couches.
- If heavily infested, we will remove the gauze or dust cover backing on the underside of box springs, most sofas and other upholstered furniture.

ITEMS THAT MAY BE DAMAGED BY THE HEAT

- Soft vinyl items, Plants, pets (including fish), Candles, Lipstick and other melt able Cosmetics, Medicines and Vitamins, Arts and crafts assembled with vinyl, Photographs (may stick together) Aerosol cans, Cigarette lighters, Fresh fruit, Vegetables, chocolates any other items that may be damaged by heat. PLEASE REMOVE AND PLACE THESE ITEAMS IN A SAFE PLACE.
- If you are unsure whether or not some items may be damaged by heat, please consult our office or management.
- Our technician may stand mattresses and box springs on end, move furniture away from the walls, remove items from closets, tip over sofas and couches, remove cushions, remove bedding etc. This may result in dirt and dust being disturbed. We will return items as close as possible to their original location.
